

Riverbed Technology Launches Swiss Office

3 Aug 2006: Riverbed Technology Inc, a California-based specialist in wide-area data services (WDS) solutions, has expanded operations by opening a new sales and support office in Zurich, reports development agency Greater Zurich Area.

The firm also has new or expanded offices in Italy, South Africa and Spain. Riverbed's technical support is provided by centres in San Francisco, New York, Amsterdam, Singapore and Tokyo.

Riverbed Technology is a leader in wide-area data services (WDS) solutions. By enabling high-speed application performance over the wide area network (WAN), Riverbed enables a distributed workforce to collaborate as if it were local.
